Make your own Planter

Recycle a dry food, or other dry goods, carton to make your sapling planter

1. Cut down a used carton (a cereal box is ideal) approx. 13cm height.

2. Cut in half.

3. Slot one half inside the other.

4. The planter is nearly ready.

5. Carefully make holes in the base and sides.

6. Line with newspaper, tissue or kitchen towel to prevent the soil falling out before planting.

Your planter is now complete.
Time to plant.
